1 Scope and application

This EUROMAP recommendation defines the connection between the injection moulding machine and the thermocouples. This is intended to provide interchangeability.

The connection may be used for eight thermocouples.

2 Description

The material of the plug contact shall preferably be the same as the thermocouples.

3 Type of thermocouples

Thermocouples as described in IEC 584 part 1, type Fe-CnNi (J) should be used.

4 Plug and socket outlet

The connection between the injection moulding machine and the thermocouples is achieved by the plugs specified below ¹⁾. The male side of the plug is fitted to the injection moulding machine.

Arrangement of pins and sockets viewed from the mating side (opposite the wiring side).

Figure 1: Plug on the thermocouples

Figure 2: Plug on the injection moulding machine

¹⁾ See www.euromap.org/technical-issues/technical-recommendations for suppliers

Table 1: Plug contact assignment

Plug contact No	Description
1, 9	Thermocouple No 1; positive pole on plug contact No 1
2, 10	Thermocouple No 2; positive pole on plug contact No 2
3, 11	Thermocouple No 3; positive pole on plug contact No 3
4, 12	Thermocouple No 4; positive pole on plug contact No 4
5, 13	Thermocouple No 5; positive pole on plug contact No 5
6, 14	Thermocouple No 6; positive pole on plug contact No 6
7, 15	Thermocouple No 7; positive pole on plug contact No 7
8, 16	Thermocouple No 8; positive pole on plug contact No 8

5 Sources of supply

A list of plug suppliers is available for download on the EUROMAP website:
